

Migrate your SAP workloads with trusted Google Cloud experts.

Google Cloud Professional Services help you make the most of your SAP data in Google's intelligent, flexible and trusted cloud.

Until now, many organizations have put off moving their SAP applications to the cloud. In the past, SAP upgrades and migrations could take months to plan and execute, and ensuring business continuity during the process was a daunting challenge. Now that's all changing for the better.

Google Cloud Professional Services (PSO) takes the pain out of migrating your SAP applications to the cloud. Our team delivers the expertise and best practices you need to accelerate the development of your cloud foundation, simplify your migration and unlock the value of your SAP enterprise data. And, because Google Cloud is certified to support multiple SAP solutions, VM types, operating systems and database options, we can execute a live migration process that delivers utmost reliability with zero downtime.

Dedicated Google expertise. Our dedicated team of consultants, engineers, trainers and global partners are fully equipped to solve your critical SAP migration challenges.

Proven methodologies and best practices. We recommend the best migration approaches and solutions tailored to meet your complex business requirements.

World-class training and certifications. Grow your team's skills with in-person or virtual training sessions or choose from several Google Cloud certification programs.

Global partner ecosystem delivers exceptional value. Our best-of-breed partners have the proven expertise to deliver Google Cloud services and training around the globe.

Simplify your SAP migration with proven best practices and global expertise.

Reliable

Google Cloud PSO have robust SAP expertise, backed by proven Google Site Reliability Engineering principles, to ensure fast, secure SAP migration and ongoing application availability. We work collaboratively to monitor performance and ensure service levels are always met.

Trusted

We address your business challenges with dedicated SAP expertise, industry best practices and proven methodologies. Our team includes experienced consultants, engineers and trainers focused on helping you get the most out of your SAP infrastructure in the Google Cloud.

Flexible

We provide customized recommendations and services tailored to your needs and can equip your team to take on challenges with a variety of training and certification options. Plus, you can access training and services anywhere in the world with our global partner ecosystem.

Certified to deliver top SAP performance and dependability.

Google Cloud PSO experts are trained and certified to help you deploy these SAP solutions and ensure the highest levels of performance, availability and security.
